...& Their Incredible
Phenomena...!

'Art and Design' – A technique which requires a designer to achieve the most and reduce the environmental impact through very intelligent designing and with the use of the best expertise in a particular niche. Therefore, we have made an effort to present this beautiful merger of creating a 'wow design' and the voyage of the specialist designer in reaching his leading position and his amazing 'end-...marvel...!'

DIVERSE PORTFOLIO: EMINENT & COMMITTED

Kindly share your leading brand briefings. Describe your area of operation.

AUM Architects offers consultancy services in Architectural, Civil and Interior Design. At the heart of the organization is a team of some of the most talented and dedicated architects India has produced.

What is your personal journey to success? Tell us about your beliefs.

Having graduated from VIT's PVP college of Architecture, I started my Architectural career under the tutelage of internationally recognized Architect, Hafeez Contractor. My prime architectural interest has always been pivoted around understanding complexities of the built world, which aided me to work on large-scale projects, ranging from sprawling townships to urban scale master plans. Going by the needs of the hour, I believe in optimizing limited resources to design structures and interiors that are functional.

You are an inspiring name in the field of architecture and designing. Kindly share your insights as a part of a valuable space which you would like to share with your readers on a width?

On a personal front, I feel, the discourse of Architectural and Design education to the masses is of prodigious important. I believe that a conscious effort has to be made towards Architectural Communications, by cataloguing every project in detail, imparting our knowledge and experiences at various world architectural events and lectures at eminent Architecture and Design institutions.

As a brand, we believe that ethos of integrity should reflect as core values of all the firms and we have been able to portray it at the utmost level. We recognise the value of information technology and endeavour to amalgamate the latest digital technologies available with other relevant software and hardware tools in order to meet the challenges and demands of the Design industry in the current environment.
