

This creative workspace is a coalescence of a formal office ethos blended finely with streaks of colour to supplement the design with vibrant vitality.

IDEA

This 6000 sq.ft. office space, designed in the heart of Mumbai, is created to reflect an essentially collaborative work environment that triggers motivation and credible efficiency. Incorporating the existing furniture as a part of the scheme, the client desired an immediate representation of the extant office interiors. Overcoming the rigidity of the challenge, the team concocted a layout that blends office ethos with an ingenuine finesse of commercial design.

DESIGN

Pivoted around creating a chromatic ambiance, colour has been inculcated on the bulky columns with a wrap of custom-made wallpaper. The MD's cabin has a customised desk finished with a bottle green table top drips across various elements with hints of brass edge posing for sovereignty. A custom printed wallpaper forms an elegant milieu to an antique glass chandelier, rendering it as the accentuating facet of the design. The flooring in B wing includes different shades of laminated wooden flooring that bind the entire work environment with a string of warmth.

“We believe in optimizing limited resources to design buildings and Interiors that are functional.”
